REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method of recovering texture information for an error block in a video stream. The sole independent claim identifies the uniquely distinct feature, "for accumulating filtering results of pixels that are located on the texture edge in a selected direction using a corresponding counter, determining filtering weights based on the accumulation results of each counter corresponding to the predetermined directions and reconstructing the texture data of the error block in the spatial domain based on the texture data of surrounding pixels of the error block". The closest prior art, Guleryuz (USPN 7,260,269 B2), discloses an image recovery algorithm that recovers completely lost blocks in an image/video frame using spatial information surrounding these blocks, one application focuses on lost regions of pixels containing textures, edges and other image features that pose problems for other recovery and error concealment algorithms; while Moran et al. (USPN 5,204,920), disclose method and apparatus for region and texture coding, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
